

Math 113(2) - Comments for HW5

Seewoo Lee

September 30, 2018

Some general comments:

1. **DO NOT CHEAT!**
2. Please use staplers or clips, not just fold the left-upper corner of papers!
3. Try to write well! - maybe this will be harder than the first one...
4. If you can, try to use \LaTeX .
5. For questions that requires proofs, I almost not give any partial credits.

Section 8, Problem 8

-1 for little mistake, -2 for big mistake.

Section 8, Problem 42

No point for the wrong answer. If the counterexample doesn't work (for example, if it is not a permutation on a given A), then 6 points. If you didn't suggest any specific example, 4 points.

Section 8, Problem 48

5 points for strange arguments.
